

CAN YOUR ROOF WITHSTAND HAIL THIS SIZE?

OURS CAN...AND WE CAN PROVE IT!

Actual Size

3 1/2"

BALLAST & INSULATION ALL IN ONE!

LightGUARD® & HeavyGUARD®

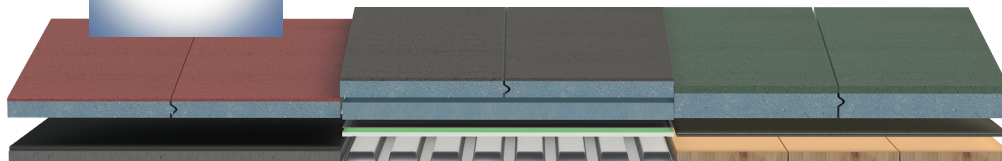

Protected Membrane Roof Panels protect any waterproof membrane from the main causes of roof failures. Including hail.

It's a proven fact! In laboratory tests conducted at Jim D. Koontz & Associates, Inc., LightGUARD PMR Insulation Panels at 40°F withstood the impact of 2" diameter ice spheres traveling at 109 fps, while HeavyGUARD panels held their own against 3.5" ice spheres traveling at over 146 fps before cracking. Cracked, not failed as the pvc single-ply membrane under our HeavGUARD panels was never touched. The only damage was to the concrete surface of the T. Clear PMR panels. Nothing penetrated the insulation portion! To learn more about how T. Clear PMR panels can protect your roof from ultraviolet rays, temperature fluctuations, physical force, wind, and hail, visit our website at www.tclear.com or call us at 1-800-544-7398.

COSTS LESS THAN PAVERS & GREEN ROOFS

Tongue and groove design provides superior wind performance.

Available in Red, Gray, Green and Tan in 2" and 3" thicknesses
