

T. Clear Self-Stick Mesh Tape

Shipping Locations:
45015

T. Clear Self-Stick Mesh Tape is available in the following size rolls:

4"x150' (10.2cm x45.72m)

Packaging

4": 12 rolls per case.

T. Clear Self-Stick Mesh Tape is a lightweight Alkali Resistant material with superior strength. It is an easy to use self-adhesive mesh tape used to cover vertical and horizontal concrete panel joints. The alkali resistance makes it an ideal self-adhesive mesh tape to use in conjunction with Portland Cement based exterior joint compounds. The blue color allows for easy differentiation from interior joint tapes on the jobsite.

Application & Specifications

General— The substrate must be dry, clean, structurally sound, free of efflorescence, oil, grease and form release agents or curing compounds. Test painted surfaces to test bond.

Installation

T. Clear Self-Stick Mesh Tape is used to cover concrete sheathing board joints. The self-adhesive tape can be applied using a trowel to keep it flat or by hand. Try to keep the tape as flat as possible centered over the gap between the joints in the concrete boards. Since the tape will typically be covered by a Portland Cement based joint compound, skim coat or mortar it is important to keep ridges in the tape surface to a minimum. Once the tape is adhered to the concrete sheathing boards it is ready to be coated with exterior joint compounds or mortars.

Specifications

Thickness	0.0086 in
Width	4.00 in
Length	150 ft
Weight	1.736 oz/yd ²
Thread Count	
Ends	18/in
Picks	9/in
Tensile	
Warp	100 lb/in min
Fill	114 lb/in min
Finish Level	18%
Finish Level w/Adhesive	28%
Alkali Resistance	Pass
